

Wheels configurator „TM Wheels“

WHAT IS THE WHEELS CONFIGURATOR?

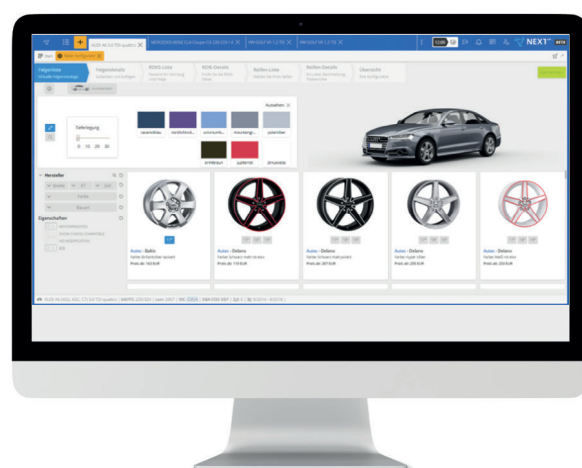

The wheel configurator integrated into the **TOPMOTIVE** catalog systems offers wholesalers and their customers, the repair shops, the possibility of finding the desired rim, TPM system and suitable tyre quickly and reliably. All of this is achieved through a guided process with 360-degree visualization, which is outstanding in the market, as well as extensive data.

WHICH FUNCTIONS DOES THE WHEELS CONFIGURATOR PROVIDE?

- + Precise **selection**: automatic hints, should a more precise **identification** of the vehicle be necessary to determine the suitable wheels
- + Diverse views through **360-degree visualization** on the vehicle
- + Market-oriented **search function** and **filtering** (e.g. customs, ABE, snow chain, etc.)
- + Specially prepared **article details** including technical vehicle information, series tyre data, TPMS information and model-related vehicle colors
- + Prominent presentation of relevant **requirements**
- + Complete wheel configuration with **TPMS & tyres**
- + Practical **overview function**
- + Direct **order** possible via the shopping cart
- + Practical cost estimate function (NEXT) including article-related **labor times**

WHICH BENEFITS DOES THE WHEELS CONFIGURATOR PROVIDE?

- + Guided configuration process
- + Fast and reliable search
- + All in one system: integration in the wholesaler's catalog
- + Acceleration of processes in daily business
- + Option for wholesalers to further expand their own business and achieve long-term customer retention
- + In „TM Wheels“ the tyre module „TM Tyres“ is already included

Tyre Module „TM Tyres“

WHAT IS THE TYRE MODULE?

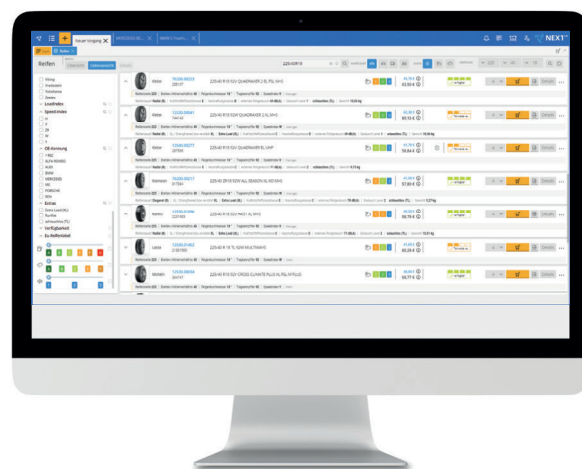

The tyre module integrated into the **TOPMOTIVE** catalog systems offers wholesalers and their customers, the repair shops, the opportunity to find the right tyre quickly and reliably. The search is possible with or without vehicle reference as well as via the common parameters in the market such as width, cross-section and inch, as well as type of use and season. The module also contains the matchcode quick search, which is widely used in the market.

WHICH FUNCTIONS DOES THE TYRE MODULE PROVIDE?

- + Permanently growing **article database** with over 180 brands and KB prices for many countries.
- + **Market-oriented search functions** via width, cross-section, inch, type of use and season as well as matchcodes
- + After vehicle identification, access to all **standard tyre and rim sizes** from the CoC papers
- + Direct jump from series size to the **result list** possible
- + Specially prepared **article details** including EU label data, profile images, all relevant technical data, EAN and manufacturer article numbers as well as detailed descriptions
- + Numerous **filter options**: Manufacturer, load capacity, speed, OE-identification, Runflat, EU-label values
- + Restrict article lists via **inline filtering**
- + Access to **labor times, prices and availability**
- + Practical **cost estimate function** (NEXT)
- + Direct **order** via the shopping cart possible

WHICH BENEFITS DOES THE TYRE MODULE PROVIDE?

- + Fast and reliable search for the right tyre
- + All in one system: integration in the wholesaler's catalog
- + Acceleration of processes in daily business
- + Option for wholesalers to further expand their own business and achieve long-term customer retention
